

MortarMaster Chemical Dosing Unit

MortarMaster

Chemical Dosing Unit

MortarMaster Chemical Dosing Unit is a compact and heavy duty chemical pump. Its portability means that it can use almost anywhere, as well as comfortably installed into other heavy duty pumps.

Despite being light and compact, the Chemical Dosing Unit is still suitable for the most demanding application. The addition of a variable flow rate control and reverse function makes it even more convenient for any pumping job with specific requirement.

The Chemical Dosing Unit is available in single phase electric or hydraulic configuration.

- **Compact & Powerful**
- **Durable Design & Material**
- **Available with Single Phase Electric Motor or Hydraulic**
- **Suitable for**
 - ◆ **Additive**
 - ◆ **Accelerator**
 - ◆ **Activated Carbon**
 - ◆ **Chemical**
 - ◆ **Limewater**
 - ◆ **Polymer & more!**

Specification

Max. Flow Rate (Continuous)	330 L/h
Capacity	0.227 L/rev
Max. Pressure	10 bar
Max. Temperature	80 °C
Inner Diameter	22 mm
Casing Material	Aluminium (Powder Coated)
Roller Material	Hard Aluminium (Anodized)

Flow Rate & Reverse Control

Single Phase Electric Motor

Hydraulic Configuration Available
